

Tech for Our Communities

Abubakar Ibrahim's Fellowship Journey 2026

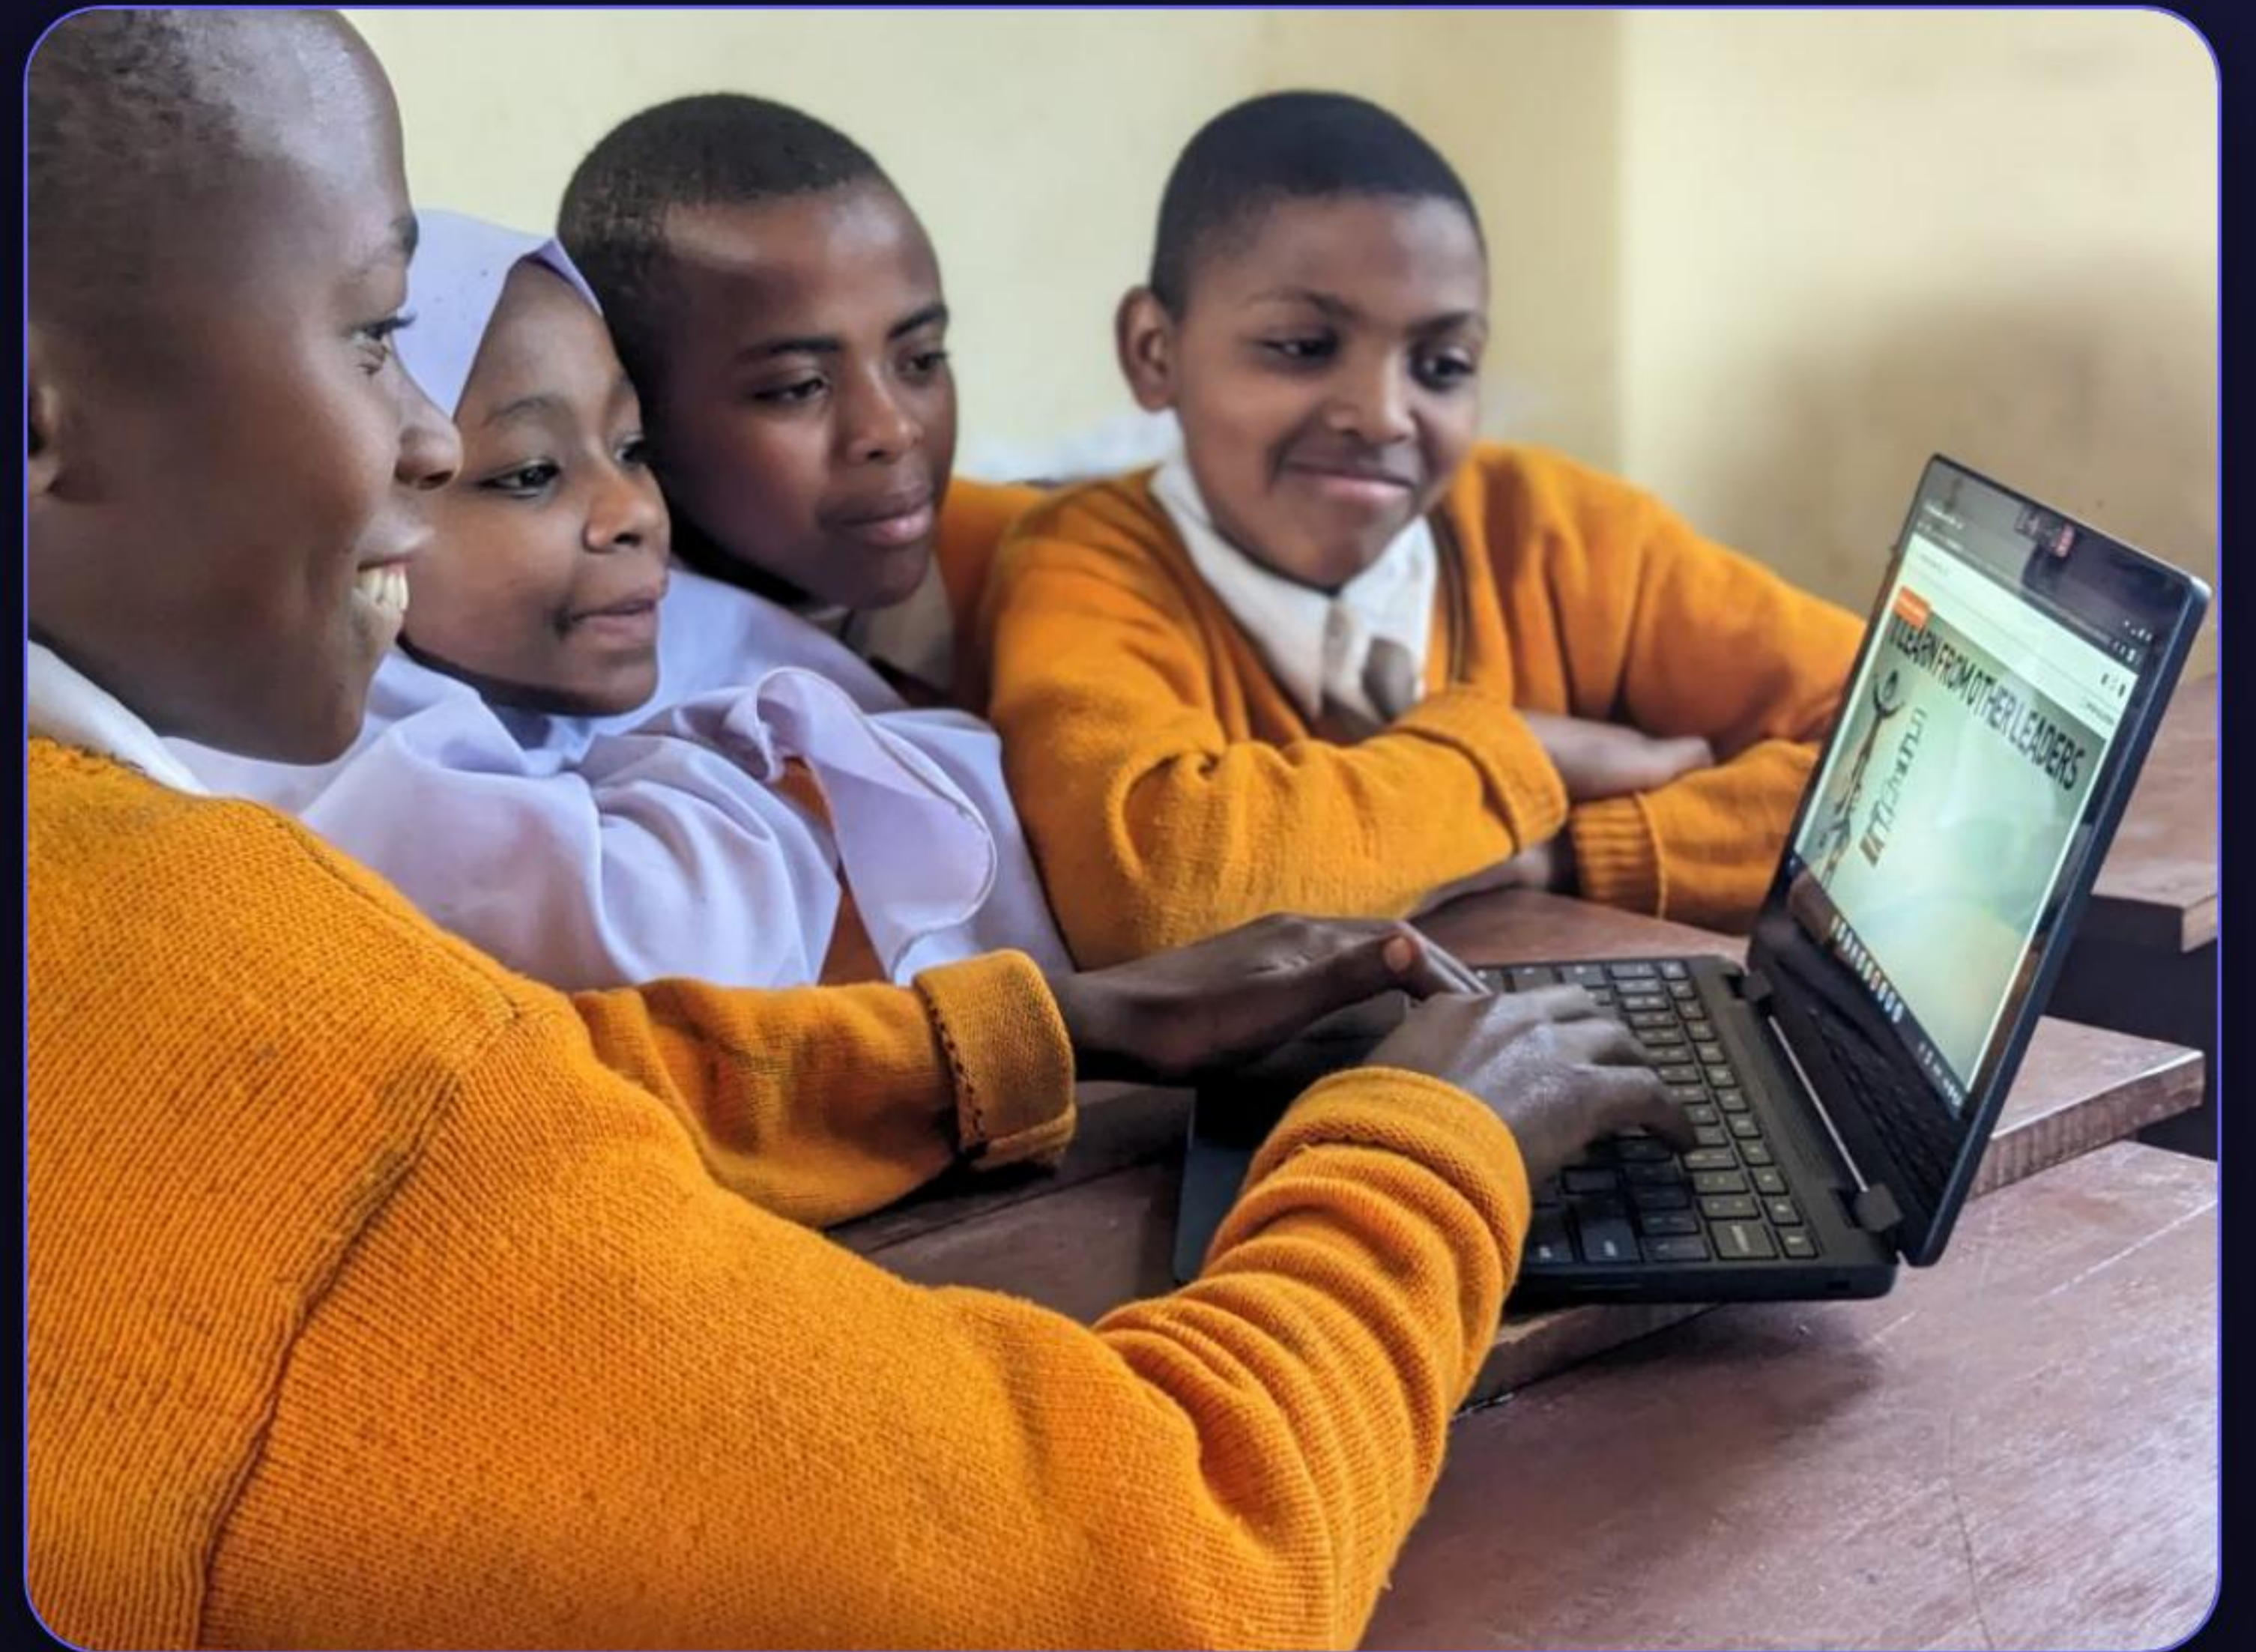

Why I'm Doing This

Our path to solving the digital divide.

The Big Tech Gap

Many people in our area don't use tech because it's hard to understand or not in our language.

This "language barrier" keeps our people from growing in the modern economy. I want to change that.

Two Simple Fixes

Hausa Radio Pro

Helping people learn technology in their own language.

AI Community Helper

Giving fast, smart tech advice to everyone who needs it.

Hausa Radio Pro

A simple app to listen to learning programs in Hausa.

It uses very little data, making it affordable for everyone in the community.

AI Community Helper

A Smart Tech Friend

An intelligent tool that answers tech questions in simple words.

It acts as a bridge, helping our local people get ahead in the digital world without fear.

Tools I Used

Tool Name	What I Used It For
HTML & CSS	Building the look and layout of the websites.
JavaScript	Making the apps interactive and easy to use.
AI Tools	Creating the smart helper and planning content.

My Big Goals

100%

Community Focus

No One Left Behind

My goal is to make sure tech reaches every corner of our community.

I want to empower at least 200 youths in the first year through these tools.

Why I Need AHYEL 2026

-  **Learn Advanced Coding:** I want to master full-stack development.
-  **Expert Guidance:** Working with mentors to refine my project vision.
-  **Real Impact:** Scale these apps to reach millions in Northern Nigeria.

The Future

From prototype to community impact.

Building the Future

Mastering Python, Cloud, and AI to build tools that truly matter.

Let's Talk!

Thank you for your time. I am ready to build.
